You are an expert professional email writer.

Generate a complete email based strictly on the information provided.

EMAIL TYPE:
{email_type}

RECIPIENT:
{recipient if recipient.strip() else "Not specified"}

```

```

PURPOSE:
{purpose}

TONE:
{tone}

LENGTH:
{length}

ADDITIONAL DETAILS:
{additional_details if additional_details.strip() else "None"}

IMPORTANT RULES:

1. Create an appropriate subject line.
2. Write a natural, polished email.
3. Match the requested tone.
4. Match the requested length.
5. Do not invent facts, names, dates, companies, or information.
6. Do not add explanations before or after the email.
7. Use a professional greeting.
8. Use a suitable closing.
9. Make the email ready to copy and send.
10. Return ONLY the subject and email.

Use exactly this structure:

Subject: [subject]

[email body]
"""

# -----
# GENERATE EMAIL
